Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-34, 39-42 and 47--53, drawn to an image metrology reference target device and methods of using same, as well as a computer medium conformed to perform same, classified in class 356, subclass 620.
 - II. Claims 35-38, drawn to methods of image processing, classified in class 382, subclass 154.

The inventions are distinct, each from the other because of the following reasons:

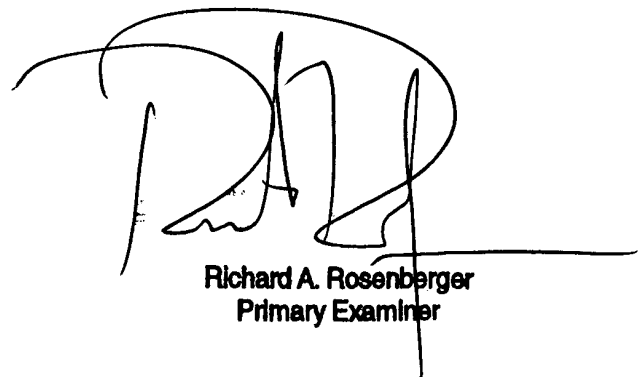

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are classed separately, and thus would present an undue burden on the Examiner, requiring a separate field of search. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Comments

4. Claims 24, 25 and 52 have typographical errors, in which each depends from "Claim 0". Claim 50 also contains a typographical error, in which it depends from itself, i.e., Claim 50. For the purposes of drafting the instant Restriction, the Examiner has assumed that: (i) Claims 24 and 25 depend from either Claim 1 or Claim 23, which is merely an inference from the dependency of Claim 23; (ii) Claim 52 depends from Claim 51; (iii) Claim 50 depends from Claim 47. However, each such error must be corrected by Applicants in the response to the instant document.
